

Leak Detector Concentrate

Allens Leak Detector Concentrate is a concentrated blend of high foaming surfactants, readily diluted for use in the fast detection of gas leaks. Completely biodegradable and non-corrosive, it can be used with a variety of applicators and to refill Allens Leak Detector Pre-diluted 1 Litre bottle.

PRODUCT INFORMATION

- **Contains a blend of anionic and non-ionic surfactants**
Ensures effective detection of gas leaks by readily forming bubbles at the area of leak
- **Incorporates a non aggressive complex detergent formulation**
Suitable for use on all surface types including soft metals and plastics
- **A readily biodegradable mild formula with neutral pH**
Safe to use
- **One pack dilutes with the addition of water to make up 1 Litre RTU**
- **Suitable for all leak detection operations**
Excess Leak Detector fluid can easily and safely be washed away
- **Conforms to BS EN 14291:2004**
(Foam producing solutions for leak detection on gas installations)

DIRECTIONS FOR USE

Fill the Allens 1 Litre Leak Detector container to the top line with tap water. Add FULL contents of this pack and shake to mix. Apply diluted product directly to the area to be tested. Any leak is quickly identified by the generation of a foam at the site of the leak. When the repair has been effected, remove excess Leak Detector with water or a damp cloth.

Store concentrate in original container in a cool place.

SPECIFICATION

Appearance:	Slightly viscous liquid
Colour:	Clear colourless / straw
Odour:	Slight detergent
pH:	6.5-7.5
Specific Gravity @20°C:	1.02 ± 0.01

SIZES AVAILABLE

Available in 125ml clear recyclable HDPE containers.
