

Leak Detector Solution

Allens Leak Detector Solution is a ready-to-use blend of high foaming surfactants specially formulated for the fast detection of gas leaks. Completely biodegradable and non-corrosive to all types of pipe media, it can be used in a wide variety of applications.

PRODUCT INFORMATION

- **Contains a blend of anionic and non-ionic surfactants**
Ensures effective detection of gas leaks by readily forming bubbles at the area of leak
- **Incorporates a non aggressive complex detergent formulation**
Suitable for use on all surface types including soft metals and plastics
- **A readily biodegradable mild formula with neutral pH**
Safe to use
- **Pack incorporates a directional nozzle**
Fluid can be applied exactly where required
- **Suitable for all leak detection operations**
Excess Leak Detector fluid can easily and safely be washed away
- **Conforms to BS EN 14291:2004**
(Foam producing solutions for leak detection on gas installations)

DIRECTIONS FOR USE

DO NOT SHAKE THE BOTTLE

Apply as a liquid, **NOT** as a froth. Leakage is indicated by the formation of bubbles or froth. Rinse off with water, or wipe away with a damp cloth to leave the area clean and uncontaminated.

Store in original container in a cool place.

SPECIFICATION

Appearance:	Non viscous liquid
Colour:	Clear colourless / straw
Odour:	Slight detergent
pH:	6.5-7.5
Specific Gravity @20°C:	1.01 ± 0.01

SIZES AVAILABLE

Available in two convenient pack sizes: 500ml and 1 litre clear recyclable HDPE containers with child resistant caps.
